

VENKATESULU DOMMARA

Developer Trainee

PROFILE

I am an emerging full-stack web developer with one year of experience in building attractive websites. Shaped and molded by Masai's immersive curriculum, I specialized in the MERN stack and I am now willing to work on and learn from meaningful projects.

WORK EXPERIENCE

Swadha Foundation -Training Developer

January 1, 2023– Till Date

Swadha Foundation is a 14-year-old Non-Profit (Ngo)(www.swfn.org) providing life-changing chances to promising rural students through a holistic approach. Joined as an intern to develop and learn post-finishing Masai School to build applications for Swadha and got promoted as a Junior developer with a stipend after 6 months. Learnings and responsibilities handled so far.

- Developed a complete module that is currently grounded up for automating the complex income assessment, which is a crucial step in Swadha 's unique selection process. Special Features of this application are,
 - Colour coding based on income,
 - Multistep process with 'save and continue' feature
 - Doc upload with size verification
- Have developed user authentication screens including Gmail integration for the overall Spashtam system.
- I am adept at efficiently managing version control and collaborative coding through platforms like GitHub.

Tech Stack – HTML - CSS | Angular | Java | Spring boot | MS SQL

ACHIEVEMENTS

- First person in my family to complete graduation after winning Swadha scholarship. Won Swadha scholarship being one among 3% of applications selected from entire district.
- Masai School – Went through a military style coding school where we were trained for 9 hours a day, 9 months in a year for 6 days a week.

Special projects -

- Pinterest Clone – <https://pinterestclone1.netlify.app/> My role in a group of 4 was developed a navigation bar, comment feature and video feature for all pages.
Tech Stack – React js | Redux | MUI | Java script | Mongo DB
- Indian recipes <https://indianfood.vercel.app/> - This was an individual project where I created a website about recipes, cooking techniques and ingredients. In addition to creating templates for content, I created a sign up and login in access to all content.
Tech Stack – React js | Redux | MUI | Java script | Json Server
